Serial No. 702,615

Art Unit 212

A more apt title is required.

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C. § 112, first paragraph, as failing to provide an adequate description of the invention. No. 17 is identified as "terminal part" (page 3) and "terminal" (page 4); not shown in Fig. 6. It is not clear how the terminal (or terminal part) is secured to the brush leaves. For example, see Fig. 5. The above-mentioned deficiencies are examples of an inadequate disclosure. If amended, it is required to properly correct the description without introducing new matter thereto.

Claims 1-6 are rejected under 35 U.S.C. § 112, first paragraph, for the reasons set forth in the objection to the specification.

The drawings are objected to under 37 C.F.R. § 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the two or more.... brush bodies (claim 1), brush bodies are different sizes (claim 5) must be shown or the feature cancelled from the claim. No new matter should be

Art Unit 212

entered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. § 102(a and/or b) as being anticipated by Campbell or Hammer. See Fig. 1 in Campbell or Fig's 2-5 in Hammer.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 3-6 are rejected under 35 U.S.C. § 103 as being unpatentable over Campbell or Hammer. Campbell or Hammer

Serial No. 702,615 -4-Art Unit 212

generally teaches the recited subject matter. It would have been obvious to one skilled in the art that the brush arms could have different frequencies of oscillation and the brush bodies could be of different sizes because this would have been within the scope of knowledge of one skilled in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication should be directed to R. Skudy at telephone number (703) 308-0302.
